

Composed of No. 2 uprights in galvanized steel tubing, Ø 60 mm section, complete with flat iron fittings for the connection of the backboard, made with a galvanized steel tube frame type "1A", section 38x25 mm, and 10/10 galvanized steel sheet. At the top of the backboard, a 20/10 thick galvanized steel plate is positioned for optional customization.

Assembly is carried out using 8.8 galvanized steel bolts and self-locking nuts. Post caps made of PE. Polyester powder coating, oven-baked at 180°C, with high resistance to atmospheric agents and UV radiation. Available only in TYPE A version (to be installed underground). The item is supplied as a mounting kit.
