

Certified by the German TÜV SÜD Product Service Institute according to the European Standard in force EN 1176. Structure made with steel poles with circular section Ø 89 mm electrogalvanized and painted steel and polyethylene PEHD colored pantographed and without sharp edges. Components: N°1 horizontal climbing with reinforced rope rings and non-slip grip connected to horizontal support in tubular sez. Ø 48 mm electrogalvanized and painted steel; N°1 curved path on circular bases in polyethylene PEHD and reinforced rope grip and colored nylon rope lock, both assembled on tubular sez. Ø 48 mm electro-galvanized and painted steel. N°1 curved climbing structure made by steel round tube Ø 48 mm, N°5 ropes with reinforced plastic rungs and ropes with steel core. N°3 starting/arrival platforms in polyethylene (PEHD). The structure is completed by N°3 stabilizer rods in round tube sez. Ø 40 mm electrogalvanized and painted steel. Assembly system with 8.8 galvanized steel bolts and self-locking nuts. Coloured nylon cap nuts as required by law. Polyester powder coating at 180°C. with very high resistance to atmospheric agents and UV rays. Polyethylene post caps. Hot-dip galvanized steel brackets for ground anchoring system.
